

Revolutionary Breakthrough UVZone Technology
Ozone + UVC Shoe Sanitizing Station (SSS)

Efficacy | Proven by independent studies from leading and renowned laboratories and hospitals

- 2020 - CREM Co Laboratory study proved that in just 8 seconds the SSS completely eliminated Coronavirus 229E, the EPA recommended surrogate standard for testing the efficacy of all products used to combat COVID-19.
- 2019 NSF International – Applied Research Center study proved pathogenic microorganism reduction on shoe soles up to 99.999%.
- Norton Healthcare earned all “A’s” on their Spring 2020 Leap Frog safety scores with 25 units at four (4) hospitals.
- Compass One features our technology in their Whitepaper | [Pillar 5: Emerging Solutions](#)
AdventHealth Connerton: Lutz, Florida: 8 Units
 - **53% Reduction** in Healthcare Associated Infections (HAIs) for the period February 2019 through March 2022 since the inception of the SSS’s and other infection control measures.
 - **92% Employee Satisfaction**
 - Pharmacy Audit: Negative for air and surface pathogen growth.

Ease of Use

- Simple Installation – place the SSS into the custom mat and plug into a standard outlet
- Step onto unit, wait for 8 seconds and step off when you hear the beep
- Supports up to 400 pounds and can be used with any footwear
- Provides 24/7 continuous clean and facility protection
- No additional FTEs required

Safety

UL Certified | CE Certified | EPA Registered | ISO 9001 Certified Manufacturer | Made in the USA

Lead Times

Units Available | Usually ships within 48 hours of Purchase Order receipt | Delivery schedule to be provided for more than 100 units | First Come First Serve | Additional Support Provided

Everybody's Talking about UVZone technology

"These sanitising stations allow us to establish new protocols that proactively prevent infections to ensure the best possible outcomes for patients while they're in our care." **Debi Martoccio, Vice President and COO, AdventHealth Connerton**

"From a duty of care and liability perspective, an employer's first consideration needs to be safety. We have sought out the best-in-class technologies, including the PathO3Gen Solutions UVZone shoe sanitizing stations, to create a layered protection system for our clients." **Jeff Muller, President**

"At Solera we are dedicated to finding best-in-class technology to enhance safety and quality of life. By addressing potential floor contamination with the UVZone, our residents, staff, and visitors can be confident they are protected from disease-causing microbes that could otherwise be carried into our buildings. It's a visible sign of safety, and it's so easy to use." **Jamie Ranzan, President**

"As we were studying the best ways to keep our facilities safe, we learned viral and bacterial material from floors can rapidly spread to high-touch surfaces throughout a building. I'm confident these UVZone shoe sanitizing stations will help keep our most crucial facilities cleaner and safer, and Marion County staff and residents can feel confident we're doing everything we can to keep them safe and healthy." **Jared Goodspeed, Director, Facilities Management**

"Creating a safe experience for our guests and employees at MOSI was always the goal for us. We continually look for ways to improve and offer an even better experience. PathO3Gen Solutions UVZone technology accomplishes that and more. With another layer of sanitizing for the public, coupled with showcasing STEM technology making a real difference in today's environment... it is just about the perfect partnership." **Rob Lamke, COO**
